

Equipment Facts

These are some facts that will come up most often throughout your day.

***ADT will warranty the equipment as long as the system is being monitored.

Pet Immune Motion Sensor

- 40lb Motion that can be calibrated to 60lb
 - Pet Immune, not Pet Proof! Small cats jumping on furniture can cause false alarms.

Glassbreak Sensor

- Installed on the ceiling or wall next to a wall of windows.
- “Listens” for the frequency of breaking glass.
 - 20 ft. Radius.
 - Blinds & Curtains can affect the Radius.

Standard Door/Window Contact

- Installed on a Door or Window & tells the system if the Door/Window is open or closed.
 - Slim Design (Won't be a bulky piece of equipment)

Shock Sensor

- Installed on Windows and serves 2 purposes.
 - Acts as a Standard Door/Window Contact
 - Picks up on Vibrations – If someone tries to break the window, it sets off the alarm.
 - Can be calibrated to avoid false alarms with thunderstorms and normal use.

Remote Keyfob

- Allows the customer to activate/deactivate the system from their keychain.
 - Also has a panic button for emergencies.
 - Looks & acts similar to a car remote.
- Will work within 100 feet of keypad.

Backup Battery

- Will sustain the system for up to 32 hours in the event of power loss.

Smoke Detector

- Detects Smoke & Heat (Heat sensor sounds alarm at 135°F)
- Immediately dispatches Fire Department (ADT Does not call first)
- Has a thicker screen than store bought detectors to prevent false alarms
 - Will never be installed in an Attic – Dust clogs the screen.

Carbon Monoxide Detector

- Detects Carbon Monoxide (A toxic colorless, odorless, & tasteless gas)

Lamp Module

- Used with the ADT Pulse Application in order to turn a lamp on/off remotely.
 - The Module gets plugged into the wall and the lamp (or any other device) gets plugged into the module.

IT'S MORE THAN JUST MONITORING

Security Monitoring is obviously our main selling point but there are many other reasons to have your home monitored. Here are a few of those.

1. Home Owners Insurance Discount

This is an old one but a good one! Depending on the Insurance Company, our clients can save 10 – 15% on their Home Owners Insurance. Insurance Companies will typically give their highest discount for those customer with a monitored smoke detector!

2. Smoke or Carbon Monoxide Detectors

ADT will automatically notify the authorities when the Smoke Detector or Carbon Monoxide Detector sets off the alarm!

3. Door Chime

The door chime is a beeping sound the system makes anytime a door has been opened. Some may think it's annoying but for other customers, it can be a life saver! Parents know too well how fast small children can disappear in the blink of an eye. Having a door chime is added protection so those kids can't sneak outside.

Parents of teenagers may want to add some contacts to bedroom windows for those teens sneaking out in the middle of the night.

4. Home Automation

Lamp Modules can make it easy to turn your lights on and off through the ADT Pulse Smartphone Application. This way you don't have to walk into a dark house. If you want a lamp to turn on every day at sun down, simply schedule it through the Pulse Website.

Cameras allow you to view the inside of your home from the Smartphone Application. They will record in the event of an alarm and can be programmed to take a picture of anyone disarming the system.

Door Locks allow customers to do away with house keys all together! The keypad on the front allows customer to set up to 30 different codes that will unlock the door. The system can even the customer when the door is unlocked.

Door locks can also be used in conjunction with smoke detectors. In the event of a fire, the system can be programmed to unlock all doors!
